REUSE EUROMED 2026

EURO-MEDITERRANEAN CONFERENCE
ON WATER REUSE

JUNE 17-19, 2026
SAN FERNANDO DE HENARES
MADRID, SPAIN

Euro-Mediterranean Conference on Water Reuse

We are delighted to welcome you to this scientific event, dedicated to reclaimed water uses in the Mediterranean and Europe.

The conference will bring together researchers, water professionals, policy-makers and experts on the topic of reclaimed water (members of consultancy firms, companies, local authorities, water and wastewater state services) for **sharing feedback** of these different players in the Mediterranean and Europe (in terms of success but also analysis of failures), **prospects** and **different methodological approaches** concerning the design, operationalization and evaluation of reclaimed water projects, with main focus in agricultural uses.

Co-organized by I-ReWater Interreg SUDOE consortium, the 'Asociación Española de Riegos y Drenajes-AERYD' & Projects and Planning research group-PROePLA (USC), the conference program includes expert presentations on reclaimed water, focusing on specific themes:

- a) Legal aspects and Governance
- b) Sanitary and Environmental risks
- c) Water reuse for irrigation and agriculture
- d) Technologies water treatments & other reclaimed water uses
- e) Socio-economic aspects

The conference is also intended to be a **trade show for companies** and a brockage event dedicated to connecting participants with a view to creating new opportunities for public-private partnerships and facilitating **business networking**.

Whether you are a member of a consultancy firm, a company, a local authority or a research laboratory, come and increase your visibility and network in Spain and abroad.

The organizers

I-ReWater

[I-ReWater Interreg SUDOE](#) is a European consortium, which we are developing several studies related with sustainable management of reclaimed water in irrigated agriculture in the SUDOE space. During the next three years (2024-2026), the main objective of the **I-ReWater** project will be to improve the management of water resources in agriculture, integrating the use of urban reclaimed water in agricultural crops and considering environmental aspects to ensure its good use due to the current climate crisis. The results will be the presentation of a '*Transnational Strategy for the Use of Reclaimed Water*' and the '*HUB of Reclaimed Water Resources in Agriculture*'. The 16 partners collaborating in I-ReWater make up a multidisciplinary consortium that is complemented by the support of 39 collaborating entities.

The **AERYD (Asociación Española de Riegos y Drenajes)** is a non-profit association aimed at promoting irrigation in Spain through collaboration between the scientific-technical, business, institutional sectors and irrigation water users. The mission of AERYD is generate ideas that strengthen and promote the irrigation sector through collaboration among its agents. In this way, the aim is to contribute to the progress and welfare of society. Main objectives: facilitate the networking among the different agents in the sector, promote the generation and dissemination of knowledge and promote the sector's capabilities and expertise. **AERYD** was created in 1985 to improve information and increase the participation of Spanish irrigation experts in the ICID (International Commission on Irrigation and Drainage).

PROePLA is the acronym for the **Projects and Planning research group** at the University of Santiago de Compostela (USC). This research group is involved in various projects linked to Rural Areas development, main research lines focus on Forestry and Environmental Science, with specific projects in Forest Monitoring and Carbon Sequestration, Forest Management for Carbon Sequestration, and the Continuous Forest Inventory of Galicia. Other key areas include Water and Nutrient Management for Crops, Horticulture, and Agronomy, which investigate irrigation techniques and the effects of water on crop production, such as the I-ReWater research project, which focuses on the use of reclaimed water in agriculture. Actually, **PROePLA** has achieved the maximum regional grant as Competitive Research Reference Group (ED431C 2025/17).

Event

Dates From 17/06/2026 15:00 h
To 19/06/2026 15:00 h

Time zone Central Europe Time

Place Centro Nacional de Capacitación Agraria (CENCA) / Centro Nacional de Tecnología de Regadíos (CENTER)

CONDITIONS SPONSORING ENTITIES

Entities interested in participating as a sponsor of the event can contact reuse.euromed.2026@gmail.com for any further information. The benefits of participating as a sponsor are outlined below.

1. Exclusivity within your area of interest. Only one organization per area.
2. Participation as co-organizers.
3. Participation in various committees and roundtables during the congress.
4. Closing dinner, one seat at the head table.
5. Registration included for congress attendees (up to 3 registrations).
6. Static advertising for the organization.
7. Dynamic advertising of the Entity's "Brand" in the congress event hall.
8. Inclusion of the Entity's logo in the header of all generated documentation (congress newsletter, website, mailings, etc.).
9. Corporate merchandise to be given to Congress attendees.
10. Dissemination of the Entity's participation through Aeryd's communication channels.
11. List of congress attendees and contact information.
12. Certificate of participation.

Organizational Notes:

The Entity's contribution may be financial or in-kind, according to its interest and capacity; and always with the objective that the sponsors cover the material costs of the REUSE-EuroMed-2026 logistics. Organizers will not make the agreements or individual contributions public, but will publish the total amount. A corresponding sponsorship invoice will be issued for all financial contributions, based on the signed agreement.

The deadline for signing the sponsorship agreement is set for **May 15, 2026**.
